## **Supply chain update from SPEL Products**

**25th March 2020**

Communication will be key in the days and weeks ahead. This is likely to be the first of a number of updates to help keep you in touch with the impact that Coronavirus (COVID 19) is having on our operation and what we are doing to help. The safety and wellbeing of all our stakeholders remains of highest importance during this challenging period.

Our factory operation is functioning with minimum interruption and finished products are being dispatched to sites that are happy to receive them. Our Sales and Client Support team are available to deal with your enquiries, most of them are now working from home to help protect themselves and their families.

We are confident that our stock levels, supply chain and manufacturing ability will enable us to continue to deliver as long as we are permitted to do so, this includes our critical support sector clients such as medical, emergency service, MOD, water and food.

SPEL Products has been in business for over 5 decades and has come through many challenges, owed in no small part to our great team of people and the loyalty of our valued clients. We will be pleased to work with you through this fresh challenge. Be positive (even when its hard) and we invite you to reach out and discuss any product, or project with one of the team, our phones will be manned as normal in the weeks ahead.

All the best and kindest regards,

Paddy Hayes  
*Sales Consultant*
