

SPELGuard

Commissioning & Servicing

Investing in a SPEL Water Quality System is a great step in fulfilling your corporate responsibility and protecting the environment. Follow up maintenance is equally important and SPEL are here to help.

As the focus on water quality in the UK increases, pollution incidents can be very costly in time, money and brand impact which is why SPELGuard is ready to help. High quality maintenance is not as expensive as you may think due to SPEL's competitive contract service rates and the intimate knowledge of our own systems. Our engineers are fully trained in operation, maintenance and compliance and we have a network of tanker support for cleaning and survey operations. So from alarms and separators to pump stations and containment systems SPELGuard is ready to support you all the way.

Why SPELGuard?

Peace of Mind

Your site and surrounding waterways are protected from the detrimental impacts of untreated stormwater and you are protected from the disruption caused by a failed product.

Comply with Regulations

Ongoing servicing is key to ensuring that your site meets current and predicted standards and regulations. By investing in regular SPELGuard servicing, you protect the environment and reduce the risk of prosecution.

Maximise your Device, Minimise Disruption

Regular servicing and upkeep reduces the likelihood of premature replacements, breakdowns and other issues which may have costly results.

Flexible Servicing Options

SPELGuard work with you to ensure that the service package is tailored exactly to your site needs.

Our SPELGuard Engineers cover the whole of the UK

SPELGuard Capabilities

Commissioning

Qualified Servicing Technicians

Service and Inspection

Accreditation and Certification

Once the site has been successfully commissioned by our SPELGuard Engineers, a product certificate is provided for your records.

SPELGuard Commissioning and Servicing Packages are available for the following products:

Site Visits & Contracts

SPEL offer both one-off servicing visits and servicing contracts

Both have the following benefits:

Compliance with British Standard BS EN 858-2

Carried out by professionals with an in-depth knowledge of all products

Comprehensive reporting along with recommendations

Bespoke servicing options based on client and site requirements

Reduce the need for expensive remedial costs

Full servicing record provided by SPELGuard

Contracts also include:

Reduced price call outs

Reduced price spare parts

Flexibility around number of site visits each year

SPEL Products have a proven record with their pollution control systems and have a wealth of experience in the drainage infrastructure sector. The SPELGuard service and support division has been set up to monitor, service and maintain your SPEL water quality assets at peak performance.
